A lovely game, full of charm and personality.

It definitely deserve a better exposure, the adventure will be short but you will want to replay it to see the different narrative path.

If you dont get charmed by its graphics, yopu will fall under the charm of the soundtrack!

A unique experience!. Excellent block-placement mouse-escort puzzle game with good level design.. 100 % thats what we need a game full of tricks and good strategy and very addictive keep it up (y). Pretty good idle game.. That's a bad joke.. When a Mommy Contra and a Daddy Megaman love each other very, very much...

...you get a game that's just as hard as either of them, and just as rewarding. If you like the kind of difficulty that makes beating an early stage feel as satisfying as completing an entire other game, this one's for you.

TIPS:

- If you have a good combination of power-ups, try to make sure you don't die, as they may not be there next time - that's right, power-ups in this game are randomly generated!
- Personally, I found the spread gun, boomerang gun and the rockets to be the most effective primary weapons. For auxiliary fire, you'll want the rockets, beam weapon or the flamethrower.
- Each stage has three bosses. The middle one is always the hardest.
- If you can get past stage 2, it seems to get significantly more forgiving.

Better to grab it at 0.79 when it really goes on sale since it's not worth the 7.99 or 8 bucks should I say. To be honest it's pretty legit minus the the voice acting and the blant story but the gameplay isn't that bad. I'm one of those people who still play old games on Steam and want something cheap but pretty good at the same time. I can play this game when I'm bored or if I'm using a low end computer if I don't have access to my PC or if I'm on the go so this can be an exception. Graphics aren't that bad actually and it's not really a blurry mess. (I mean who plays for graphics these days?).. I enjoy games like this, but not this one. It's story and characters are flat at best, and the ability to explore is offset by a weak narrative that gives no sense of direction, plus there is no meaningful way to track your progress.. Not optimized and controls are a bit weird navigation can be stupid. I liked the first S&S but I don't enjoy this one in the slightest.

One issue is that nothing about the sequel is improved, it is worse than the original game. In particular the game balance is very poor.

One annoying design feature from the first game that has been left in makes the game very frustrating for me. When you go into the menu to chose what tech to develop next the game doesn't pause. I like real time games but I enjoy taking my time deciding my strategy. This lessened my enjoyment of the first game and ruins it for the sequel.. very fun vodka game,

10/10 hoping to get to 1000 hours. Very Good Game.

Shame there aren't any loot boxes though.
